

Welcome to Transatel

GETTING STARTED

1 Insert the SIM card in your device.

Your device must not be carrier locked. Make sure you detach the SIM card at the format corresponding to your device.

2 Configure your APN settings (Access Point Name) as follows:

- ▶ Name and APN = mobiledata
- ▶ All other fields should be left empty

Devices	Configuring APN settings
Android	Settings > More > Mobile networks > Access Point Names
iOS	Settings > Mobile data > Mobile data network
Windows Phone	Settings > Cellular + SIM > SIM settings → Edit internet APN
Laptop	Open Wifi networks > Right click on the "Transatel" network > Properties > Profile

3 Activate data roaming in your settings.

No worries, there won't be any extra charges with this option ON.

Devices	Activating data roaming
Android	Settings > More > Mobile networks > Data roaming
iOS	Settings > Mobile data > Enable data roaming
Windows Phone	Settings > Cellular + SIM > Data roaming options > Roam
Laptop	A pop-up window will open asking you to allow data roaming or not, choose YES

CREATING YOUR ACCOUNT

- 1 Use your new Transatel DataSIM card's connection (3G/4G) and connect to tds-selfcare.com. Make sure your Wi-Fi is turned off.
- 2 Fill in your username, password and email to access your account from any device. You can use this account to check your balance and recharge your SIM card (see below).

CHECKING YOUR BALANCE / RECHARGING

Once logged into your account, you can (free of charge):

- ▶ **Check your balance**, by clicking on "Check your account"
- ▶ **Recharge your account**, by clicking on "Recharge or add a data bundle"

Ready to use

High quality network

Support in English

Easy recharge
